Session 4: Access to and sharing of research data from public funding

Peter Arzberger

Preliminary Report on the Recommendations of the CSTP Follow Up Group on Sharing of Publicly Funded Research Data

Drawing on case studies of current data sharing practices in various scientific communities, previous investigations in this area, and the expert knowledge of the Follow Up Group, this talk will present the recommendations for improving the sharing of publicly funded data among researchers in OECD countries and beyond. The recommendations focus on practical steps that can be taken by the principle participants in the emerging global science system: international bodies, national governments, research support agencies, research institutions, professional associations and individual researchers.
