The European Molecular Biology Laboratory (EMBL), an international research organisation with its Headquarters Laboratory in Heidelberg (Germany), Outstations situated in Grenoble (France), Hamburg (Germany) and Hinxton (UK), and a Research Programme at Monterotondo (Italy) has the following vacancy in Heidelberg:

**POSTDOCTORAL POSITION**

to study BIOCHEMICAL INTERACTIONS
(Ref.03/PD/04)

Applications are invited for a postdoctoral position at the European Molecular Biology Laboratory (EMBL) in Heidelberg, Germany. The successful candidate will work in the Scientific Core Facilities, Services and Technology Programme.

Applicants should hold a Ph.D. ideally in biochemistry, physical chemistry or biophysics and have experience in surface chemistry and macromolecular interactions. Regardless of the specialisation, a strong background in biochemistry is required since the project will deal with effects of enzymatic and chemical modifications of nucleic acids and proteins on their interactions. The successful candidate will work on elucidating mechanisms of binding and behaviour of biological macromolecules on nanostructures. Experience with technologies used to study those interactions (STM, AFM) is highly desirable.

Please note that EMBL does not return CVs and attached documents to applicants.

To apply for this position, candidates should submit a detailed CV, including names and addresses of two referees for letters of recommendation, quoting ref. no. 03/PD/04, to:

The Personnel Section, EMBL, Postfach 10.2209, D-69012 Heidelberg,
