The European Molecular Biology Laboratory (EMBL), an international research organisation with its Headquarters Laboratory in Heidelberg (Germany), Outstations situated in Grenoble (France), Hamburg (Germany) and Hinxton (UK), and a Research Programme at Monterotondo (Italy) has the following vacancy in Hamburg:

**POSTDOCTORAL POSITION**  
(Ref.03/PD/05)

Applications are invited for a postdoctoral position at the EMBL outstation in Hamburg, Germany.

The work will involve development of tools and protocols for assembling, tuning and running software modules, specifically for structure solution, improvement of crystallographic phases, automatic interpretation of electron density maps and assessment of quality of X-ray data and structural models. A background in protein crystallography and interest in methodology is essential. Emphasis will be on computational techniques. Familiarity with computer programming, statistics and mathematical algorithms is advantageous.

For further information on EMBL, please refer to the following websites: [http://www.embl.de](http://www.embl.de) and [http://www.embl-hamburg.de](http://www.embl-hamburg.de)

Please note that EMBL does not return CVs and attached documents to applicants.

To apply for this position, candidates should submit a detailed CV, including a list of publications (if relevant), and a summary of recent projects, scientific interests and expertise, as well as the names and addresses of two referees for letters of recommendation, quoting ref. no. 03/PD/05, to:

**The Personnel Section, EMBL, Postfach 10.2209, D-69012 Heidelberg,**
